

Essential Mouthguard BY:

Missing Link to Heat illness in the field

- Partnership
 - HyOx SuperWater
 - The Waterboy Program
 - What does this mean

"The Waterboy safety program is designed to reduce all levels of dehydration and heat stroke by using our advanced mouthguard technology and be used as an alert to detect body temperature during dehydration in the field."

Our products started the Waterboy program in May of 2022 in Temecula RC varsity team and have now captured the attention of Gatorade as the missing link thru Al Martin, we have partnered with Super Water HyOx to bring the Highest Graded Oxygenated Water to bring the Best Waterboy Program to the market. With the support of Meijer stores and Best Buy Retail we are supplying, we can direct clients to local stores and all school athletes as well as direct to Consumers and or Organizations.

Our Mission

SHURFIT Essential is dedicated to the pursuit of Health Assurance through the use of advanced technology from our essential mouthguard product, to detect heat illness (fever), while providing protection and the prevention of spreading pathogens.

Our comprehensive products offer a graduating color change indicator, activated by body temperature, with a full color change at 100.4 degrees and above.

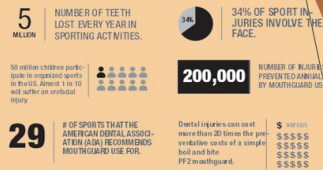

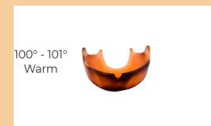

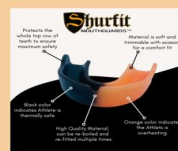

This advanced technology gives athletes and active fitness participants the confidence they need to perform at their best while staying safe.
